

certbot

All commands executed in priviledged mode

Show certificates in certbot registry

```
certbot certificates
```

Renew (with and without dry-run)

```
certbot renew --dry-run  
certbot renew
```

Interactive deletion

```
certbot delete
```

Remove cert from certbot's registry

```
certbot delete --cert-name (domain)
```

You will need to review nginx's config and disable sites to avoid 'nginx -t' negative response.
