

2025-05-15 - at KAFD, Riyadh, KSA

There was a hectic weeks behind, some topics I briefly touched:

- Audacity: conference mic spectrum analysis
- OPNsense: upgrade v24.1.7--25.1.5_5 (FreeBSD v13.2--14.2)
- OPNsense: script to extract users' certificates and list expired (users), but after upgrade realized, that these features implemented in the newer version. :)
- Configured DMARC and SPF on mail servers
- Analysed radio spectrum for WLAN access point
- Samsung S21, S24: upgrades to Android v14
- Prepared and printed out salad order form for "Plenty SLD" salad shop.
- Icinga: did research on 'zones' and configured infra for distributed monitoring
- goTeleport: configured PAM solution with backend reverse proxy
- Nextcloud: upgrade v27--29
- AlpineQuest Pro: challenge with azimuth on a bigger scale
- built a script to generate the characters in Morse Code to be learnt in more sophisticated way.
- cancelled Spotify subscription, as Yandex Music provides more and better
-
