

2025-07-26 - here and there

- Deployed PAM solution: goTeleport
- Garmin Boating (former Navionics) on Android tablet for a week long charter in the Med, Turkey.
- began to gather digital assets (photos, documents and similar) from different places into on: `Samsung SSD 990 PRO PCIe 4.0 NVMe M.2 SSD - 4 TB` in UGREEN case.
- `AlpineQuest Off-Road Explorer Pro` with OpenStreetMaps on Android tablet for forest plot mapping
- km6ve1 - Proxmox on miniPC Dell (x64)
- km6fw1 on km6ve1: OPNsense
- km6fw1: OPNsense: Configured PPPoE for local ISP
- MyLifeOrganized (MLO) as collaboration tool for task management
- Collabora Office setup
- Nextcloud on Oracle Linux 9
- Reviewed and enhanced Repository server for Oracle Linux
- Deployed BookStack on Oracle Linux
- VirtualBox: adding storage to the virtual machine (extending space with LVM)
- Ordered "BIG letters" for radioamateur contests and "Blender related shortcut/hotkey" stickers from 4keyboard.com
- Transfer TOTP from `FreeOTP+` via `QR Journal` via `QR Capture` to `YubiKey Authenticator`
- PrivX Core + PrivX Carrier and Web proxy.
- gcp1mx1: Fail2Ban
- Nginx `ngx_http_limit_req_module`, specially to optimize user experience with web applications, such as Nextcloud.
- GCP: reviewed, cleaned up and enhanced firewall rules (not policies)
 - Disabled SSH access, which is enabled by default in GCP.
- OPNsense:
 - Configured OpenVPN server to push to the client predefined IP address.
 - Created plenty of firewall aliases
 - Rewrote firewall rules to refer to aliases, nor to the static values
- Tunnelblick, as alternative to OpenVPN Connect: differenced in handling routing table.
- Experimented with MacWhisper
 - lead to [WhisperCpp](#)
- Alternative to native Calendar on MacOS - BusyCal
- EnterpriseDB PostgreSQL Extended - setup on Oracle Linux, using Repository server (proxied packages to the infrastructure)
