2026-09-20 * The Resurrection of Dubai

After regional turbulation, Dubai begins to live fall. Tourists are coming, temperature is decreasing, accommodation prices go high ..

Meanwhile, Anton was busy with

- Keepass2Android and KeePassDX: Password Managers for Android (Nextcloud friendly), keyfile and Yubikey NFC support
- BookStack update on Oracle Linux using git
- git intermediate repo setup to act as a git repo proxy
- leipomot.2dz.fi -- bakery project (reserve your pastry and collect it), Python + Flask deployed onto GCP Functions, Firestore and Firebase. Deployed into -stg and -prd environments.
- SUSE Multi-Linux Manager (MLM) installation on SLES
- Disable sleep on MacOS, even if lid is closed with no AC power (on battery)
- keepassxc-cli: entry creation
- vim editor: colorscheme, clean search (to remove highlight), indenting several lines
- curl: resume download from the interrupted place (`curl -C - -O https://from/file`)
- Local DNS server: AdGuardHome on openSUSE v16.1 natively (no containers)
- RHEL v9.8: locking to minor version, not to accidently perform minor release upgrade with ordinary `dnf update` command without subscription
- OpenSSL: checking for insecure versions `-max_protocol TLSv1.1` and `-min_protocol TLSv1.2` flags
- openSUSE v16.1 as secondary working and personal station onto several devices:
  - Apple MacBook Air 5,1 (`mbpfan`, modprobe: `hid_apple fnmode=2`,)
  - Lenovo ThinkPad T580
  - Lenovo ThinkCentre M93p
- Apple MacBook Air 5,1: locking FN button to access standard function keys
- STM32IDE and STM32IDEMX on openSUSE v16.1
- prototyping:
  - building code and flashing STM32 Discovery board Nucleo L476 (AI assisted)
  - "blinking LED" project to test above on STM32 Discovery board Nucleo L476 (AI assisted)
  - "compass" project on STM32 discovery board MB1035B with STM32F303VCT6 MCU (AI assisted)
- openSUSE v16.1: disabling unnecessary services
- purchased dummy-DP and dummy-HDMI plugs to simulate connected display for correct power management for laptops and headless workstations and remote access
- Terraform deployments

Revision #5
