

2026-10-14 + fall in UAE

- + launch of mirrors.oiv.ae - to promote and maintain Linux OS within the region of Middle East, act as upstream for neighbor regions (Africa) : terraform, rsync + intelligence (smart scheduler, integrity checks, main pool and candidates, time tiers and traffic shaping, speed tests)
- + launch of stg.leipomot.2dz.fi (*fin.* bakeries) - pastry ordering platform from artisan and small bakeries within Finland (GCP Functions + GCP Firebase)
- + Kindle Oasis jailbreak: KOReader, KTerm + bluetooth keyboard
- + new project SMSgw - SMS gateway (using old-box USB MF823 4G modem as a lab rabbit). Features: SIP integrations (to SMS--SIP, SIP--SMS validation, forced acknowledgement), mail integration (SMS--mail, mail--SMS), WAN link traffic control based on budget, secure data-at-rest and data-in-transit, messages signatures and audit.
- + handy (speech-to-text) cross-platform tool
- + VSCodium (pure VS Studio Code without Microsoft telemetry bundle)
- + Thunderbird extension: "Render Markdown Messages"
- + Markor: markdown compatible editor for Android
- keepassxc-cli: daily operations with password manager using CLI
- + tuxedo: todo.txt task management utility
- + 0x54ask: task manager on Android (via F-Droid)
- + btop - TUI process manager (can show GPU, press 5)
- + nvtop - TUI NVIDIA activity monitor
- + Gitlab: pipelines for multi-regions multi-environment refactoring
- + Terraform: IaC to deploy environments
- + Vault: daily operations (cleaning, adding)
