

Nextcloud - twofactor issues

There is a known issue with `v2` of `twofactor_email`, that with enforced MFA, user will not be asked to enable MFA provider (by email). As v2 is legacy by Roeland Jago Douma and Olav Seyfarth and is not supported anymore, `v3` is maintained by ``datenschutz_individuell``.

package	dependencies	changes	
twofactor_email v2.8.1	Nextcloud Server v30--33		
twofactor_email v3.5.1	Nextcloud Server v33--35		

For `twofactor_gateway`, enables integration with different HTTP(S) based endpoints:

package	dependencies	changes	Supported SMS providers
twofactor_gateway v1.2.1	Nextcloud Server v31--31		ClickSend ClickatellCentral ClickatellPortal ClockworkSMS EcallSMS HuaweiE3531 OVH PlaySMS PuzzleSMS SMSApi MSGGlobal SerwerSMS SipGate SMS77io SpryngSMS VoipMS VoipBuster WebSms
twofactor_gateway v2.5.1	Nextcloud Server v32--32		+CegedimVortex

twofactor_gateway v3.3.0	Nextcloud Server v33--33		= same
